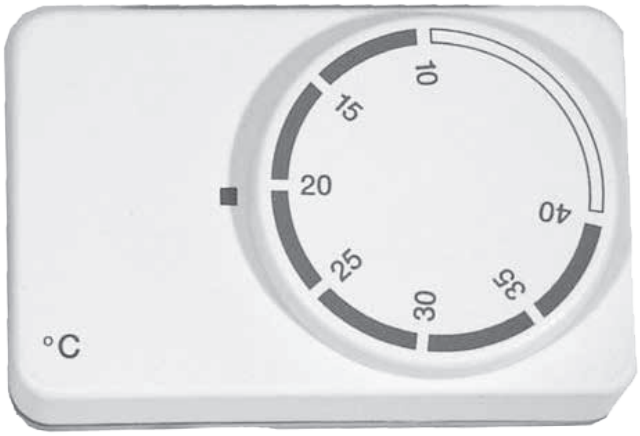
Temperature regulator TR24-M



Quick facts

- Integrated sensor for regulating room temperature
- Provides settings in the range 10-40°C
- Powered from the actuator

Use

The TR24-M is a temperature regulator with an integrated sensor for regulating room temperature. The regulator is specially adapted for the continual control of regulating actuators and can be set in the range 10-40°C.
The regulator is powered from the actuator.
The desired regulation effect is selected with jumpers on the circuit board.

Specification

Temperature regulator TR24-M

Technical data

Power consumption	max. 15mA
Setting range	10-40°C
Sensor range	5-40°C
Control signal (Y)	DC 2 …10 V
Dimensions (WxHxD)	77x50x30 mm
